

Task:

Refer to our sample Welcome Email design (email_desktop_desktop.png) and create an **email HTML markup with styles**. It should work in popular desktop and mobile clients.

There are accompanying image files* that you will need to use while creating the template.

Note: you can use any images for spacer, feedback buttons and social media icons as these are not provided in the attachment.

** these images are meant to be used only for this task, do not use them anywhere else*

Additional details:

- We expect the email to be as responsive as possible
- The code should be optimised for all major email clients and devices
- There are no specifications for padding, use your own discretion where necessary
- All the call-to-action buttons must be linked
